gochanged.com – A fintech mobile app that rounds up your online purchases and uses those funds to pay off student loans.

Superpower your spare change

The average $37,172 student loan can end up costing you over $60,000 if you stick to the minimum payments every month.

You can save over $10,000 if you make additional payments regularly. But budgeting for that isn't easy.

ChangEd makes it effortless by rounding up your everyday purchases to the next dollar and setting aside your spare change for principal payments.

INTERNSHIP TESTIMONIALS

Michael Umenta | Berlin
Vanderbilt University
Major: Computer Science
Minor: Engineering Management
Startup: Soundbrenner (Consumer electronics company that develops wearable, smart devices for musicians)
"At Soundbrenner, I worked on improving iOS accessibility for visually impaired musicians, constructing a more efficient localization workflow for the multiple platforms the company runs on...The Sage Corps experience helped me decide and commit to a post graduation career path. As a result, I have never felt more assured of the future."

Shirley XueYing Xu | Singapore
Mount Holyoke College
Major: Statistics
Minor: Data Science
Startup: Zumata (AI-powered recommendation applications for travel industry)
"The internship at Zumata gave me an opportunity to know what it really feels like to work for a technology company as a data analyst. A real-life industry project is so different from academic projects and requires more time for every task. I learned to multi-task and keep good records of what I do so I can clearly explain to my colleagues"

Neil Limaye | Amsterdam
University of Illinois
Major: Aerospace Engineering
Minor: Computer Science
Startup: Pikaplant (Design-led startup focused on inventing, designing and producing luxury furniture)
"The most important lesson I took from Sage Corps was that everyone you work with at a startup has a genuine interest in doing the best job, so always think about how you can improve your work."
